SIBIN P

FULL STACK DEVELOPER

+91 8590675644 | puthramannilshibin@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer specializing in Python, Django, Django REST Framework, and PostgreSQL, with hands-on experience building database-driven applications and responsive user interfaces in React. Experienced in developing robust REST APIs, relational schemas, and modular ERP/CRM platforms with tenant isolation. Solid foundation in machine learning and artificial intelligence, with a focus on writing clean, maintainable, and pragmatic code.

TECHNICAL SKILLS

Programming: Python, SQL, HTML, CSS, JavaScript, TypeScript (Basic)
Backend: Django, Django REST Framework, Flask, REST API Development
Frontend: React, HTML, CSS, JavaScript, TypeScript
Databases: PostgreSQL, MySQL, MongoDB, SQLite
Data & AI: Pandas, NumPy, Machine Learning, Artificial Intelligence, Deep Learning, PCA, ANN
Tools: Git, GitHub, VS Code, PyCharm, Postman, Jupyter Notebook
Core: Data Structures & Algorithms, OOP, Database Management, Problem Solving

PROJECT EXPERIENCE

ICORP ERP PLATFORM | Django REST Framework, PostgreSQL, React, Docker, AI Assistant **GitHub**

- Built a production-ready, multi-tenant ERP platform integrating inventory control, sales, purchasing, and double-entry accounting.
- Implemented tenant data isolation, secure authentication, standardized CRUD REST endpoints, and Docker container orchestration.
- Integrated an AI operational assistant and workspace collaboration tools (real-time notes, email, document center).

ENTERPRISE CRM PLATFORM | React 19, Vite, Django REST, PostgreSQL, Twilio Voice API, SimpleJWT **GitHub**

- Engineered an enterprise CRM system with lead tracking pipelines, deal progression stages, and customer support ticketing.
- Integrated Twilio Voice API for automated direct calling and bridge calling with resilient simulated mode fallback.
- Implemented role-based permissions and verified API reliability with automated GitHub Actions CI/CD workflows.

FACE RECOGNITION PIPELINE (PCA & ANN) | Python, NumPy, OpenCV, PCA, ANN **GitHub**

- Implemented surrogate covariance PCA for eigenface feature extraction and dimensionality reduction.
- Built and evaluated an Artificial Neural Network (ANN) classification model using backpropagation with custom confidence thresholding.

DJANGO E-COMMERCE APPLICATION (DJANGO FLIPKART) | Python, Django, PostgreSQL, SQLite, JavaScript

- Developed a database-driven e-commerce platform with product catalogs, category filtering, and session-backed cart management.
- Implemented secure user authentication, order processing, and optimized Django ORM queries to prevent performance bottlenecks.

REDUX E-COMMERCE PLATFORM (CORRIDOR B2B) | React, Next.js, TypeScript, Redux Toolkit, Tailwind CSS

- Developed a structured trade platform featuring quotation management (RFQ) and multi-attribute product comparison matrices.
- Managed centralized application state using Redux Toolkit slices with strict TypeScript type safety.

EXPERIENCE

CRM DEVELOPER INTERN | Upcode Software Labs Pvt. Ltd. *6 Months*

- Worked on development of a live CRM project using Django, Django REST Framework, PostgreSQL, and ReactJS.
- Analyzed and implemented business requirements, building clean RESTful API endpoints and relational schemas.
- Collaborated on frontend integration and conducted comprehensive API endpoint testing using Postman.

ARTIFICIAL INTELLIGENCE INTERN | Internship Studio, Pune *4 Months*

- Worked on a face recognition project using Principal Component Analysis (PCA) and Artificial Neural Networks (ANN).
- Performed data preprocessing and feature extraction using PCA.
- Built and evaluated ANN models for face recognition using backpropagation algorithms.

EDUCATION

Bachelor Degree | MES Kalladi College

CERTIFICATIONS

Python Full Stack Developer | Upcode Software Labs 8 Months
CRM Developer Internship | Upcode Software Labs 6 Months
Artificial Intelligence Internship | Internship Studio 4 Months
