SUMMARY

Python Full Stack Developer (B.Com graduate) building Django REST Framework APIs on PostgreSQL and React frontends. Built a multi-tenant ERP with double-entry accounting, and contributed to a team-built CRM during a software developer internship at Upcode Software Labs. Trained in data analysis (Python, Excel, Power BI) and completed an AI/ML internship.

SKILLS

Backend: Python, Django, Django REST Framework, REST APIs, JWT (SimpleJWT)
Frontend: React, Redux Toolkit, JavaScript, HTML, CSS, Tailwind CSS
Databases: PostgreSQL, MySQL
Tools: Git, GitHub Actions, Docker, Postman
Data: Pandas, NumPy, Excel, Power BI

EXPERIENCE

Python Full Stack Developer | AX Ventures, Calicut — Sep 2026 – Present

- Working on the backend of BYCE, a gym membership platform for customers and gym owners in Kerala, using Django REST Framework and PostgreSQL.
- Documented the MVP backend architecture: data model, REST API contract, authentication and role permissions, location-based gym discovery, and Razorpay payment and booking flows.

Software Developer Intern | Upcode Software Labs L.L.P, Kannur — Dec 2025 – Sep 2026

- Worked in a six-person team on the company's live Full Stack Development project, a CRM built with Django, Django REST Framework, PostgreSQL and React.
- Built REST endpoints and database models from business requirements; tested APIs with Postman and supported frontend integration.
- Technologies: HTML, CSS, Bootstrap, JavaScript, Git, ReactJS, Redux, Next.js, TypeScript, RDBMS, Python, Django, Flask.

Artificial Intelligence Intern | Internship Studio, Pune — 4 Months

- Built a face recognition model using PCA for feature extraction and an ANN trained with backpropagation (github.com/shibinputhramannil/Face_Recognition-PCA-ANN).

PROJECTS

ICORP ERP Platform | Django REST, PostgreSQL, React, Docker — github.com/shibinputhramannil/IcorpERP

- Built a multi-tenant ERP covering inventory, sales, purchasing and double-entry accounting.
- Implemented tenant data isolation, secure authentication and standardized CRUD REST endpoints.
- Containerized with Docker; added an AI assistant and workspace tools (notes, email, documents).

Enterprise CRM Platform | Team project · React 19, Django REST, PostgreSQL

- Built the backend activities module (notes and a reusable activity framework) and completed the companies module.
- Implemented support-ticket features (list, detail, edit, owner filters) and the lead profile and activity timeline in React.
- After the internship, containerized my copy with Docker Compose and added GitHub Actions CI (Django checks, frontend and Docker builds).

TRANST E-commerce | Django REST, React, Redux Toolkit, PostgreSQL — github.com/shibinputhramannil/transt-ecommerce

- Built JWT authentication, protected routes and server-side cart validation.
- Implemented atomic checkout using `transaction.atomic()`.

TRANST Website | React, React Router, Vite — transt-website.vercel.app

- Built a live five-page company website with a filterable product catalog, an enquiry form, and SEO metadata (Open Graph, JSON-LD).

EDUCATION AND TRAINING

B.Com | MES Kalladi College — 2023

Data Analysis (Python, Excel, Power BI, Machine Learning) | Techolas Technologies, Calicut — Aug 2023 – May 2024
